

Danville-Pittsylvania County MPO
FY 2026
Unified Transportation Planning Work Program (UPWP)

Introduction and Summary of Planning Process

Structure/General Organization

The Unified Transportation Planning Work Program (UPWP) defines the transportation planning processes and programs used by the Metropolitan Planning Organization and is normally developed and adopted on an annual basis. The overall authority for transportation planning in the Metropolitan Planning Area is in the hands of the Metropolitan Planning Organization (MPO) which is made up of locally elected and administrative officials of the local government members (City of Danville and County of Pittsylvania) and representation from the Virginia Department of Transportation (VDOT); these members make up the Policy Board and are the voting entity for the MPO. There are seven eligible votes on the Policy Board: three from the City, three from the County, and one from the Virginia Department of Transportation. The City, County, and VDOT have provided for alternate voting members from staff and administration. The MPO also has a Project Management Team (PMT) appointed by the MPO Chairman that is primarily administrative and planning personnel from the area; the PMT is the MPO's technical committee.

Planning Sources and Processes

With the establishment of the MPO, the Danville-Pittsylvania County area has available to it an organization for transportation planning which can provide a forum and instrumentality to bring together comprehensive and cooperative planning approaches that may lead to new, worthwhile project alternatives. These project ideas may eventually find their way into a transportation improvement program (TIP) at some future point in time if funding can be identified for their implementation. The planning efforts managed by the MPO include provisions for citizen participation.

Environmental Justice is an outgrowth of an Executive Order signed by President Clinton in 1994. The Executive Order augments Title VI of the Civil Rights Act of 1964 by making the prohibition of discrimination based on race, color, and national origin more specific. It addresses persons belonging to Black, Hispanic, Asian American, American Indian, Alaskan Native, and low-income groups. The intent of environmental justice is to improve transportation planning and decision-making by including all public groups in the planning process. Specifically, Metropolitan Planning Organizations are expected to enhance public participation by eliminating participation barriers and engaging minority and low-income populations in making transportation decisions. To assure success of this process, the needs of these groups must be identified. This can be accomplished in part by identifying residential, employment, and transportation patterns of low-income and minority populations. By identifying these factors, impacts and benefits of transportation investments can be more

equitably allocated. To complete the process of identifying these needs, it is necessary to engage these groups in planning discussions and meetings to the extent practicable.

To help explain environmental justice, the Executive Order and the U.S. Department of Transportation present three fundamental principles. These principles are:

1. To avoid, minimize, or mitigate disproportionately high and adverse human health and environmental effects, including social and economic effects on minority populations and low-income populations.
2. To ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
3. To prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority and low-income populations.

The Danville MPO is meeting these principles by continually examining the location and service area of each of its transportation improvements to ensure that its transportation system adequately and appropriately benefits all groups of the Region's population. The MPO is also providing direct notice to as many entities representing the various groups, including groups representing disabled and underserved persons in the Region as is practicable. The MPO will also hold public meetings and other activities in facilities that are centrally located and accessible by as many transportation modes as possible. Additionally, the MPO will make available meeting materials in Spanish, and the MPO will use CyraCom or another platform for translation and interpretation services. The MPO will continue its work in complying with the Environmental Justice regulations by utilizing data provided by the 2020 Census and the socio-economic data base developed for the LRTP update. The transportation system's effectiveness in serving the Region's minority and low-income groups is being evaluated by using this data in the development of maps that show concentrations of the minority and low-income segments of the population in the Region.

The UWP in the Process

The UWP attempts to set out the planning efforts being undertaken by the various entities of which it has knowledge. To date, the primary efforts listed originate with citizens, the local governments, VDOT and the MPO Policy Board. Project development and recommended planning project activity generally proceeds through Project Management Team consideration and then to the MPO Board, which, after consultation, makes final changes and project selection.

UWP and the TIP

As implied, the UWP annually sets out a compendium of transportation planning activities for which authorization and funding support is to be sought. Activities included normally are presented on a one-year schedule. The MPO Policy Board is also responsible for developing the annual TIP.

The projects considered in the TIP are different from those in the UWP. Items for inclusion in the TIP are done in the following ways:

- They have reached the project level;

- They involve capital improvements;
- They have been selected for implementation;
- Funding sources have been determined; and
- They cover an extended time period typically of three years.

The UWP is a planning activities administration tool, whereas the TIP sets out a schedule of actual projects for implementation. Projects in the TIP may also be end products of planning work carried out under the UWP.

Meeting National Goals for Transportation Planning

The UWP and the planning process it engenders allows the MPO to participate in and meet requirements from the national perspective of conducting a *Continuing, Cooperative, and Comprehensive* transportation planning process that results in plans and programs that consider all modes of transportation and support metropolitan community development and social goals. This is widely known as the "3-C Process."

Current and Future UWP Activities and Facing the Future Issues

As noted, the MPO has engaged in a number of short-range planning activities. Historically, the MPO has undertaken numerous short-range projects such as corridor studies, intersection studies, and transportation development plan updates. In the future it is anticipated that the MPO through the UWP-specified activities will continue to undertake short-range type planning activities to manage congestion and monitor for Long-Range Transportation Plan update needs depending on availability of financial support for the planning activities. The MPO will also be expected to work with the Commonwealth and federal agencies, as deemed appropriate, in implementing the guidelines and programs under the Bipartisan Infrastructure Law (BIL) and other applicable federal transportation policies.

The MPO will follow the implementation and will seek opportunities to capitalize on the BIL adopted in November 2021. The Bipartisan Infrastructure Law, passed as the Infrastructure Investment and Jobs Act, provides long-term funding for surface transportation infrastructure planning and investment, including increased funding over the previous FAST Act. The BIL authorizes \$567.5 billion over fiscal years 2022 through 2026 for all modes of transportation administered by the U.S. Department of Transportation. This includes \$274.1 billion in new funding. The BIL maintains a focus on safety, keeps intact the established structure of the various highway-related programs, and continues efforts to streamline project delivery.

The Danville MPO understands the importance of utilizing Disadvantaged Business Enterprises (DBEs) in the procurement process and will make its best effort to utilize DBEs on third-party contracts.

Primary issues facing the area include how best to redesign and improve the transportation system and, at the same time, ensure that necessary funds will be available to undertake the physical projects needed. The key question is whether there will be funds available to undertake the physical improvements that are ultimately prompted from the planning process.

FY26 Work Plan Tasks

During this fiscal year, the following activities will be pursued by MPO and VDOT staff:

Task 1.0 Administration and Maintenance of the Transportation Planning Process

1.01 General Administration and Operations

Description: This task includes ongoing activities to ensure the proper management and operations of the continuing, comprehensive, and coordinated (3-C) planning process. The objectives of this task are to implement the FY 2026 UPWP throughout the fiscal year; provide all required administrative functions including accounting, personnel, contract, and office administration; and support the activities of the Danville MPO through preparation of agendas, attendance, scheduling meetings, reports, minutes, and other duties as needed for the MPO Policy Board and subcommittees such as the Project Management Team/Technical Advisory Committee.

End Products:

- Prepare meeting agendas; minutes; resolutions; arrange for and/or attend meetings, conferences, and training.
- Preparation for and attendance at the MPO Policy Board meetings.
- Preparation for and attendance at Project Management Team (Technical Committee) meetings or WebEx meetings, including any work for special committees.
- Process PL funding requests; VDOT preparation and/or review of PL and PL Pass-through funding agreements and addenda.
- Review local and regional transportation planning activities and attend public hearings conducted by the MPO as needed.
- Develop and employ mechanisms for accommodation of MPO transportation planning activities with guidelines for Environmental Justice and with regulations for Title VI of the Civil Rights Act. Efforts can include: developing processes to evaluate disproportionate impacts and distribution of benefits and burdens of plans and programs on low-income and minority populations; establishing procedure to assess low-income and minority population participation in the planning process; incorporate Environmental Justice in the UPWP. MPO staff will seek out and continue to participate in a Title VI Civil Rights training activity during FY 26.

- Prepare and execute funding agreements and contracts, including contract extensions or supplements, as needed.
- Prepare and review progress, financial, and other supportive reports; VDOT: review and process quarterly billing invoices and progress reports.
- In FY 26, in the interest of improving public access to MPO transportation planning activities, the standalone MPO website will be maintained and updated, incorporating transportation activities, programs, studies, reports, meetings, and other items of public interest.
- Review as necessary, consultant contracts or supplements and monitor consultant contracts, negotiations, and work progress on MPO-sponsored transportation planning and studies employing consultants.
- Respond to requests for intergovernmental reviews and their coordination with the West Piedmont Planning District Commission.
- Review proposed enhancement projects as requested.
- Employ training, courses, seminars, and conferences to enhance the transportation planning and administration skills of staff and/or Policy Board, Project Management Team/Technical Advisory Committee.
- Update the Study Data and Prioritization Tool (SIPT) with the most recent data available as a means to identify viable consultant-led studies in future years.

Completion date: Ongoing/Continuing in FY 2026

Budget: \$17,000 Staff: \$17,000

1.02 Reporting and Compliance with MPO Required Tasks, Regulations

Description: This task includes all activities associated with annual development and maintenance of the annual MPO work program (UPWP) and Transportation Improvement Program (TIP), including amendments, as well as any necessary and required updates to the 2045 Long-Range Plan.

End Products:

- Process amendments to FY 2026 Unified Transportation Work Program (UWP) and prepare the FY 2027 UWP.

- Develop and process as necessary amendments to the FY 2024-2027 Transportation Improvement Programs (TIPs) as requested by VDOT.

Completion date: Continuing/Ongoing FY 2026

Budget: \$7,900 Staff: \$7,900

Task 2.0 Long-Range Transportation Planning and Surveillance

2.01 2045 Long-Range Transportation Plan Maintenance

Description: During FY 2026, MPO staff will continue to coordinate, maintain, and amend as necessary the Long-Range Transportation Plan updated to the Year 2045, completed in the first quarter FY 2021; b) Evaluate any requests or needs for modification of the Long-Range Transportation Plan, including responding to BIL requirements and preparing for future updates including the next transportation reauthorization bill.

End Products:

- Public assistance and information.
- Updates and amendments to keep Plan current.

Completion date: Ongoing in FY 26

Budget: \$1,100 Staff: \$1,100

2.02 Consultant Led Studies in Support of Long-Range Planning Efforts

Description: The MPO has provided for the potential of initiating local transportation planning efforts to assist the City of Danville and Pittsylvania County with their needs and supporting the continual ongoing development of projects that derive from the Long-Range Transportation Plan and its recommendations list.

In FY 26, the MPO will utilize its consultant support to update the 2045 Long-Range Transportation Plan (LRTP) to horizon year 2050. It is an FHWA requirement that the LRTP be updated every five years for metropolitan planning organizations falling within EPA “attainment areas,” for criteria pollutants. The current LRTP was adopted in August 2020, meaning that this plan is now required to be updated. The MPO anticipates utilizing an on-call consultant in furtherance of this effort. It is anticipated that the process to update the LRTP will require a minimum of 12 months, thereby accounting for the majority of activity during FY 26, and possibly into early FY 27.

Consultant agreements will include provision for end products to be provided as a deliverable for the project. If budgeted funds are insufficient to accomplish all the items listed in the FY 26 work plan, the required balance for funding will be programmed in the FY 27 UPWP if desired

by the MPO Policy Board. Additionally, if time is insufficient to accomplish the update of this LRTP during FY 26, the UPWP for FY 27 will include a provision for the plan's completion.

Current / Ongoing Initiatives:

Development of Safe Streets and Roads for All (SS4A) Safety Action Plan:

In Fiscal Year 2023, West Piedmont Planning District Commission, on behalf of the Danville MPO, was awarded a Safe Streets and Roads for All (SS4A) planning grant. In Fiscal Year 2024, the MPO, in partnership with EPR, PC, began the process to develop the SS4A Safety Action Plan, in anticipation of applying for a SS4A Implementation Plan following completion of the Safety Action Plan. The Safety Action Plan was completed and adopted in February 2025. The MPO intends to submit a SS4A Implementation Grant in FY 25 or FY 26, or assist the City of Danville or Pittsylvania County in submitting such a grant.

Update of Danville MPO Long-Range Transportation Plan:

In Fiscal Year 2026, the Danville MPO will continue work on the process of updating the *2045 Danville MPO Long Range Transportation Plan* (LRTP), which is anticipated to begin near the end of FY 25. The current (2045) LRTP was adopted August 20, 2020, and the updated plan will have a horizon year of 2050. As was the case with past updates of the LRTP, the MPO will rely on the resources and expertise of a consultant, which will be selected from among the WPPDC's bench of on-call consultants.

Future Consultant-Led Studies:

Norfolk-Southern Railroad Crossing at West Main Street (City of Danville): This study is needed to address a safety issue pertaining to a single Norfolk-Southern railroad track that crosses West Main Street in the vicinity of Gatewood Drive. The track currently includes warning signage and flashing lights, but no safety gates. With the recent completion of a casino farther east along West Main Street and the potential for other development that has the likelihood to increase traffic volumes along this corridor, it is likely that this railroad crossing will pose a greater safety risk to the traveling public. Therefore, a study is needed to determine how best to address this safety concern.

U.S. Route 58 East (South Boston Road) from Danville Regional Airport east to the eastern MPO boundary (City of Danville and Pittsylvania County): This study would evaluate safety, functionality, and multimodal transportation needs and formulate recommendations thereunto along the U.S. Route 58 corridor between Danville Regional Airport and the eastern MPO boundary.

West Main Street between the limits of former Dewberry Study (Schoolfield) and U.S. Route 29 Interchange (City of Danville): Include study of and potential improvements to the West Main Street corridor as a priority in the next update of the Danville MPO Long-Range Transportation Plan. Subsequent to that, a study is recommended by the City to identify safety, functionality, and multimodal travel needs and to formulate relevant recommendations along the corridor. Given the recent development of a casino as well as future developments that will likely influence traffic volumes, safety, and the built environment along the corridor, a corridor study will be imperative within the next several years.

End Product: Consultant-led study reports including supporting graphs, pictures, maps, drawings, and other pertinent statistical data.

Completion Date of 2050 Long-Range Transportation Plan: 1st Quarter of FY 27

Budget: \$217,819.96 Staff: \$30,911 Consultant: \$186,908.96

2.03 VTRANS/Multi-Modal Planning Support

Description: Assist VDOT District Office and Central Office with the dissemination of the completed documents regarding the final VTRANS, the Statewide Multimodal Plan, and the Surface Transportation Plan initiatives including stakeholder outreach activities to produce public understanding of the contents and utility of the VTRANS and associated planning efforts and the related documents.

End Products:

- Assist TMPD staff on any public involvement support needed for any updates;
- Provide representation to the VTRANS Multimodal Advisory Committee.

Completion date: Ongoing in FY 2026

Budget: \$4,532 Staff: \$4,532

2.04 Freight Planning

Description: Assist VDOT staff with freight planning under VTRANS: 1) with data collection from any needed survey effort required of the MPO; 2) with public involvement and participation efforts in Plan document updates.

End Products:

- Data collection from a survey if needed

- Public involvement and participation assistance as requested by TMPD.

Completion date: Continuing FY 2026

Budget: \$3,400 Staff: \$3,400

2.05 Response to BIL and Other Federal Requirements

Description: MPO staff to work cooperatively with the Virginia Department of Transportation and Federal Highway Administration-Richmond staff, as necessary in accommodating the Bipartisan Infrastructure Law (BIL) and other pertinent federal transportation policies -- based requirements needed for the MPO to attain full compliance. The staff, with help from the FHWA and VDOT, will also want to monitor, maintain, and improve upon the Public Involvement Program that the MPO uses in its operations.

Fiscal Year 2026 activities will be flexible to be responsive to any demands placed on the MPO with the advent of the BIL or other federal requirements. MPOs will need to monitor new policy directives in the CFRs of public comments and responses as well as the final regulatory actions generated subsequent to the federal public involvement/comment process.

In an effort to continue to meet objectives identified by the FTA and the FHWA, the MPO will continue to execute and refine the Performance Based Planning and Programming process. The MPO will seek guidance from the Lynchburg District VDOT Planning Staff and the FHWA staff in considering any recommended changes or refinements to this process.

End Products:

- Maintaining reconciliation of MPO's transportation planning processes for compliance with the BIL and other applicable federal regulations. Work may include other planning efforts with State agencies to meet the regulations and fulfill required planning efforts.
- Revise, as necessary, the Public Involvement Process to comply with BIL requirements. An end product aiding this will be:
 - a) Development of recommendations for improvements to public involvement efforts.

Completion date: Continuing in FY 2024

Budget: \$10,424 Staff: \$10,424

Task 3.0 Technical Assistance

3.01 General Development and Comprehensive Planning

Description: This task allows for assistance to MPO localities on transportation-related activities on an individual basis or MPO basis, as needed.

This task includes but is not limited to:

- Providing transportation planning and plan development assistance, transportation technical input, and resources to the MPO's localities to improve the overall effectiveness and efficiency of the transportation network;
- Assessing the impact of major developments and other significant land use changes on the transportation system;
- Assisting with the update of local comprehensive plans to ensure land use and other elements are consistent with the statewide and MPO transportation plans and other planning documents;
- PDC Staff will compile all available and future land use GIS layers/attribute data from local comprehensive plans within the Planning District Commission boundaries. The staff will use the GIS tool provided by VDOT-TMPD to geo-reference local transportation plan recommendations. The PDC staff will coordinate and utilize the assistance provided or as needed from VDOT-TMPD in accomplishing this task.
- Assisting with other duties as requested by VDOT, FHWA, and the MPO, including participation in the NEPA process for transportation projects.

In an effort to ensure its effectiveness in regional planning, the MPO will consider or revisit, if applicable, its metropolitan area planning agreements with area local governments or other area MPOs to facilitate to the greatest possible extent cross-jurisdictional communication among the VDOT, MPOs, and area local governments to improve collaboration, policy implementation, technology use, and performance management.

The MPO will place emphasis on exploring opportunities to identify and address gaps in transportation access to essential services such as health care, employment, education, and recreation. The MPO will explore opportunities to reach underserved populations by evaluating its public participation plans with the intent of communicating with and more effectively involving disadvantaged populations in the transportation planning process.

- Assist with developing regional consensus on priorities of highway, transit, bicycle and pedestrian projects for consideration by the Commonwealth Transportation Board for inclusion in the Six-Year Improvement Program.

- The MPO staff will monitor and attempt to exercise measures to promote safety-conscious planning in the current and future fiscal years.
- Review road plans for conformity with current transportation plans; assist with area and District-wide planning for Intelligent Transportation Systems (ITS) and higher levels of technology for project developments in the future.
- MPO staff work on GIS, CTPP data for distribution and utilization related to transportation planning projects, studies, and coordination as appropriate.
- If requested, coordinate multi-modal study activities and maintain necessary transportation inventories, including bicycles or bicycle paths.
- Evaluate and review special situations such as: major traffic generators, site plans, elderly and handicapped needs, and any needs for Paratransit projects.
- Continuous review of current transportation plan(s) for consideration of additional TSM improvements such as traffic engineering, fringe parking lots, bicycle and pedestrian facilities, goods movement, and vehicle occupancy.
- Assisting VDOT and other Commonwealth transportation agencies in development of statewide plans to meet federal requirements or the requests of the Office of the Governor or in order to respond to General Assembly legislation.
- Assist City and County in developing project needs for inclusion in their Comprehensive Plan's Transportation Elements Chapter.
- Provide VDOT GIS layers and any other related data obtained from the City of Danville and Pittsylvania County relating to parcel index, future land use, etc.

End Products: Reports, correspondence, work papers, mapping or other work products generated in the course of staff provision of general technical assistance

Completion date: Continuing FY 2026

Budget: \$21,630 Staff: \$21,630

VDOT-TMPD Support to MPOs:

VDOT's Transportation and Mobility Planning Division (TMPD), located in the Central Office, will provide statewide oversight, guidance, and support for the federally-mandated Metropolitan Transportation Planning & Programming Process. TMPD will provide technical assistance to VDOT District Planning Managers, local jurisdictions, regional agencies, and various divisions

within VDOT in the development of transportation planning documents for the MPO areas. TMPD will participate in special studies as requested.

DANVILLE URBANIZED AREA METROPOLITAN PLANNING ORGANIZATION

APPROVAL OF THE DANVILLE MPO
UNIFIED TRANSPORTATION PLANNING WORK PROGRAM
FISCAL YEAR 2026

At a meeting of the Danville Urbanized Area Metropolitan Planning Organization (MPO) held on April 3, 2025, the following Resolution was adopted:

WHEREAS, for Fiscal Year 2026, \$191,018.53 in PL funds including provision for state and for local matching amounts from Danville and Pittsylvania County are anticipated to be available to the Danville MPO; and

WHEREAS, of the \$191,018.53 in PL funds, \$96,897 is to be contracted to the West Piedmont Planning District Commission for ongoing administration, consultant management, PL-supported planning activity and support, transit planning, and other responsibilities arising under the FY 2026 UWP; and

WHEREAS, the FY 2026 work program includes consultant-led studies in support of long-range planning efforts as described in the UWP subject to review and approval by the VDOT and FHWA; and

WHEREAS, the Virginia Department of Transportation will be contributing its efforts to MPO work elements, including assisting in the review of long-range planning studies and other tasks, on behalf of the Danville MPO during FY 2025; and

WHEREAS, the City of Danville and Pittsylvania County agree to provide their appropriate share for the general administration, technical, and consultant work funded through use of PL funds; and

NOW THEREFORE BE IT RESOLVED that the Danville Urbanized Area MPO hereby adopts and requests VDOT and FHWA approval of its FY 2026 Unified Transportation Planning Work Program (UWP) in the total project amounts of \$191,018.53 inclusive of matching amounts and with provision for funding the WPPDC/MPO administration, consultants, and MPO/City of Danville transit planning efforts.

Certification

The undersigned duly qualified and acting as an officer of the Danville Urbanized Area MPO certifies the foregoing is a true and correct copy of a resolution, adopted at a legally convened meeting of the Board of the Danville Urbanized Area Metropolitan Planning Organization held on April 3, 2025.
